Anthology Ally

Empower learner choice.
Build inclusive environments.

We know institutions worldwide serve a diverse adult learner population with unique needs, challenges, and preferences. That is why having inclusive learning environments with full access to digital course content benefits all learners and is key for success. Anthology® Ally works across any LMS to create more inclusive learning environments by dynamically enhancing digital course content for adult learners.

The accessibility journey

Building a more inclusive learning environment is a continuous path that can be difficult in many ways. With cutting-edge technology and time-saving automated tools designed for inclusivity, institutions become aware of accessibility issues, keep up with rapidly changing accessibility requirements, and mitigate accessibility barriers.

Accessible content is better content

Equity is not about disability or ability; it is about accessibility for everyone. Empower choice with Anthology Ally by providing dynamically enhanced learning materials for learner preferences and needs, and give learners the flexibility of choosing the most effective way to interact with digital content.

Anthology Ally also allows you to take down language barriers across your team. Equipped with broad translation capabilities, Ally enables learners to access content in whatever language they prefer and are most comfortable with.

A sustainable change in behavior

With Anthology Ally, instructors can go beyond guidance. Thanks to built-in feedback, they can gain insights to automatically improve the quality and usability of their course materials faster and create fully accessible content with best practices in place.

Go from reactive to proactive

Performance reports are key for data-driven improvement decisions. Anthology Ally makes you aware of accessibility issues to keep up with rapidly changing accessibility requirements and enables you to proactively address accessibility barriers to drive success.

LMS agnostic

Anthology Ally works seamlessly across these platforms and more: Blackboard Learn, Open LMS, Canvas, and Brightspace.

Anthology Ally Worldwide — 1,500 institutions, 95 million courses, 3.9 billion content items
