

Blackboard Custom Development Services

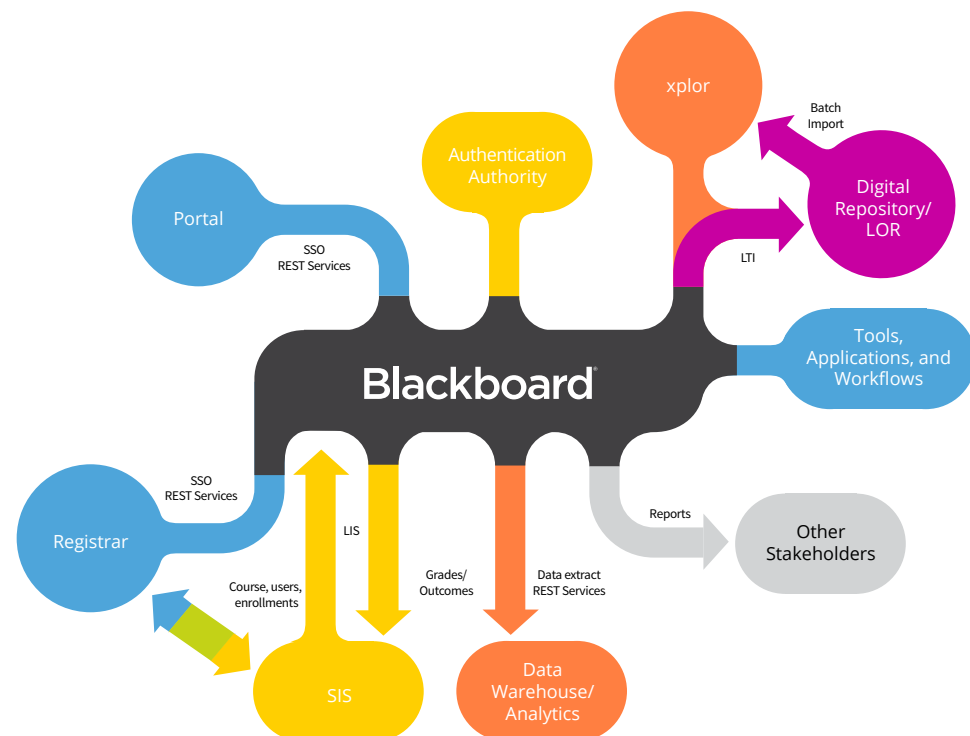

We understand that every education institution technology ecosystem has evolved over time, so trying to impose a “standard” way of working often won’t work. Whether it’s integrating with your data warehouse, creating custom reports or working out the best way to enroll your students, we can help. We’ve partnered with hundreds of institutions to address these challenges – across the US and all around the world. Take advantage of our unparalleled experience.

Square pegs; round holes. It’s a fact of life for educational technology systems, with far too many having their own, special way of working. We’ve seen it time and again, but more importantly we’ve solved those problems time and again too.

Whether it’s extending the Blackboard platform or exchanging data with pre-existing systems, we are in a unique position to help. As the world’s leading provider of education technology, we have years of experience working with enterprise systems and educational technology across the full range of Blackboard products.

Our teams partner with you to design solutions and custom integrations that allow your technical teams to better support your learning environment. Our projects can entail:

- Content tools, including integration with existing authoring platforms
- Adaptive learning/learning paths
- Large-scale lifecycle solutions
- High-throughput integrations
- Complex reporting needs
- Support for local analytics and big data initiatives

Personalized solutions to meet your needs

Custom Applications unique to you

We'll develop data dashboards, building blocks, plugins, LTI integrations, and other tools specific to your needs

Custom Integrations that just work

We'll create sophisticated integration solutions between Blackboard and other enterprise platforms

Supported transition to SaaS

We'll help you preserve your existing customizations and integrations in preparation for your transition to SaaS

The personal touch

Project management

Our project management team manages objectives and milestones to ensure the success of your project: we'll make sure it runs on time and is cost effective. Blackboard provides a Project Manager responsible for the overall engagement delivery, documentation, status reporting and resource management.

Training your team

We don't just provide the tech know-how: we'll work with your academic and technical staff to ensure you have the support you need. Our team will provide user guides, technical and functional training, as well as other documentation for your projects.

Ongoing support

What happens when systems are upgraded? We'll be there with ongoing assistance to ensure that customizations and integrations are compatible with upgrades.
