

Data-empowered innovation that transforms the student experience.

Build and foster an unmatched student engagement experience. Meaningfully involve students and strengthen your data-driven insights with an accessible online environment.

Key Capabilities:

Streamlined organization management

Efficient event workflows

Understand student involvement

Guided pathways for the co-curricular journey

Powerful APIs and data integration

Engaging all students

Anthology Engage in Action

“We’ve built an online experience for students by using Engage to track and analyze student engagement and implement improvements for targeted opportunities, workforce development programs and remote activities.”

Genevieve Sharron

Program Coordinator
Columbus State Community College

Straightforward organization management structure

Create a vibrant virtual community for students by mirroring your division’s structure through administrative branches, allowing autonomy over organization registration, renewal and day-to-day management.

Enjoy efficient event planning

Effortlessly plan, organize and promote online and in-person events. Take advantage of our digital event reviewer workflows, room and resource integration and advanced RSVP functionality.

Guide the student experience

Promote student success with intentional online and in-person programming that blends guided co-curricular paths and experiences and recognizes achievements with automated badging.

Take data integration further

Get the best in data features with powerful APIs, data integrations and stability through an accessible interface—all covered by a track record of data security and privacy.
