

# Learning Happens Everywhere.

Now you can manage experiential feedback with ease.

Collect the data you need from off-campus learning experiences with Experiential Evaluations. Easily and accurately capture the feedback from your students and experiential learning educators to share reports with key individuals and departments on campus.

#### Multiple Foci of Evaluation

Beyond evaluating educators (faculty, supervisors, preceptor, etc.), students can complete self and peer evaluations. Similarly, educators can evaluate students and colleagues, as needed.

#### Results for Multiple Audiences

Use survey intelligence custom reporting to make it easy to analyze and deliver results for improving programs and learning.

#### Variability in Start Dates, Locations, and Supervision

Automate the launch of evaluations for multiple blocks and sites using relative launch dates. Students can select and evaluate their site and the educators they encounter.

#### Individual and Program Level Data

Measure performance of students, satisfaction with programs and sites, and effectiveness of experience and off-site educators.

#### Onsite Location Summary Report

Q1 This rotation was well organized.

Q2 Learning objectives and goals of the rotation were clearly communicated to me.

Q3 The assignments aided my understanding of the rotation content.
