

Checking in attendees just got easier

Say farewell to inconvenient paper guest lists and hello to your new event check-in solution! The iModules Attendee Check-In Module will allow your organization to quickly, easily, and digitally manage attendee check-in at your next event.

Integrated with Encompass and managed by your staff and volunteers through a simple and secure interface, the Attendee Check-In Module empowers you to deliver a better guest experience. Plus with real-time updates, you can see up-to-the-minute details on which guests have arrived from any device.

Fast, simple, and effective attendee management:

- Leverage existing events and registrations from Encompass
- Provide secure check-in access for event staff and volunteers with an online interface accessible from any mobile device, tablet, or computer device
- Easily add walk-up attendees using their first and last name with the option to capture class year, email address, and maiden name to ensure your data stays up-to-date
- Sort your attendee list to see who has already arrived and who has yet to check-in
- Explore details on which event staff welcomed a particular guest on-site
- Check-in attendees using multiple devices simultaneously
- Rest easy knowing your event data will automatically sync back into Encompass and can be exported at any time for easy consumption
- See the impact of your event immediately in the Engagement Metrics Dashboard

The Attendee Check-In Module provides your team with fast and convenient on-site event attendee management with the click of a button.
