

Improve Academic Advising with a Comprehensive Advising Inventory

Anthology offers three comprehensive survey instruments to help campuses assess academic advising efficacy and understand faculty, staff, and student perceptions of advising practices. Campuses receive an interactive custom report with results that can be used for individual advisor professional development and/or continuous improvement of advising protocols.

Student Perceptions

- Understand the student perspective on the overall advising experience
- Survey items align with the CAS Standards for Academic Advising
- Data from these reports is a beneficial tool for academic advising program review and/or accreditation reports

Faculty & Staff Perceptions

- Understand the faculty and staff perspective from those with direct academic advising experience
- Survey items align with the CAS Standards for Academic Advising
- Data from these reports is a beneficial tool for academic advising program review and/or accreditation reports

Student Advisor Feedback

- Advisors put themselves in the spotlight to gain analysis of their own academic advising experience
- Focus on the formative value of the feedback, and benefit from links to NACADA development resources directly related to your survey's results
