# Blackboard® LEARN

# There's more to Learn

Powered by a community of millions of students, instructors and administrators across more than 70 countries, Blackboard Learn by Anthology is the Virtual Learning Environment/Learning Management System that responds to your needs. With modern, intuitive workflows and hundreds of new features, it's time to take another look at Learn.

## Exclusively inclusive

No two learners or instructors are the same. We've created an inclusive VLE that combines consistency of experience with tools that allow users to express – and celebrate – their unique identity.

## Best Tests = Less Stress

With the best-in-class test-taking experience, Blackboard Learn is designed to reduce student stress and anxiety, while also extending more flexible design options to instructors.

# Market-leading communication tools

Deliver the interactive learning experience that modern students demand. Blackboard Learn has market-leading communication tools to foster collaboration and seamless integrations with more than 200 tech partners – including Microsoft Office – to create a holistic, engaging learning environment.

> " I love how the pages look on Ultra, and that the students make much better use of the messaging feature, which helps me keep everything in the VLE rather than spreading into my email."
>
> **Kirsty Kiezebrink**
> Dean of Educational Innovation

UNIVERSITY OF ABERDEEN 1495

**92%** of users are satisfied with Blackboard Learn and will likely continue using the brand.*

# Data you don't have to dig for

Blackboard Learn provides in-line insights direct to instructors, students and advisers at every step in the learning journey. This creates a data-informed approach to education, where courses, content and delivery can be constantly optimised to help every student achieve their goals.

> " With Blackboard Learn Ultra, we've had some massive increases in student success ... it helps with our student retention, our student success and satisfaction with our programmes altogether."
>
> **Lee McMinn**
> LMS Administrator and Instructional Designer

Greenville Technical College

Up to **35%** growth in successful grades

# Easier marking, more teaching

We've collaborated with educators to create marking workflows that align with instructors' needs, saving time and allowing you to focus on what's most important: teaching.

> " Enhancements to the flexibility of online rubrics have been well received, as have various changes to online tests both in terms of the question types available and the way in which test questions can be presented to students."
>
> **Gunter Saunders**
> Associate Director Learning Innovation and Digital Engagement

UNIVERSITY OF WESTMINSTER

**64%** of users rate Blackboard Learn 9 out of 10 or higher (versus 55% of Canvas users).*
