

There's more to Learn

Redesigned in collaboration with a community of instructors all around the world, Blackboard® Learn by Anthology provides the most intuitive and connected virtual educational experiences. With modern, enhanced workflows and hundreds of new features, it's time to take another look at Learn.

Your class, your way

Blackboard Learn offers the same pedagogical flexibility of a physical classroom. Featuring enhanced workflows and integration with more than 200 tech partners, Learn allows you to teach in your own way.

Tests that don't look like the rest

Blackboard Learn is evolving to help instructors create tests as unique as their courses. With advanced features to customise the structure and display, you can create engaging tests which improve outcomes for your students.

Easier grading, more teaching

We've created intuitive grading workflows that align with instructors' needs, saving time and allowing you to focus on what's most important: teaching.

“ Enhancements to the flexibility of online rubrics have been well received, as have various changes to online tests both in terms of the question types available and the way in which test questions can be presented to students.”

Gunter Saunders
Associate Director Learning Innovation and Digital Engagement

UNIVERSITY OF
WESTMINSTER

92%

of users are satisfied with Blackboard Learn and will likely continue using the brand.*

Centered on connection

Our market-leading communication tools connect you with your students when and where you need, while also allowing for collaboration between learners to develop team-building skills.

“ I love how the pages look on Ultra, and that the students make much better use of the messaging feature, which helps me keep everything in the VLE rather than spreading into my email.”

Kirsty Kiezebrink
Dean of Educational Innovation

1495 UNIVERSITY OF
ABERDEEN

PREFERRED PLATFORM

Blackboard Learn is the preferred platform for communication tools as compared to Canvas and D2L.*

A pathway to success

Understand the progress of your students, at both an individual and class-wide level. Blackboard Learn's progress tracking insights let you evaluate a student's progress in the context of the broader class, allowing for personalised support where necessary.

“ I went to our faculty. We ran pilot studies to better understand what that landscape looked like for our college. Here's what they came back with: they thought it was user-friendly, that it was more modern, that it was clean, that it was easy to navigate, easy to move folders around. It, in essence, was the modern LMS built for the post-pandemic higher education landscape.”

Nicholas Hryhorczuk
Academic Director of Online Learning

MORTON **MC** COLLEGE

9/10

64% of users rate Blackboard Learn 9 out of 10 or higher (versus 55% of Canvas users).*
