Blackboard Outcomes Assessment

Streamline your juried assessment and accreditation process

Ongoing program assessment is vital for maintaining accreditation and for ensuring that the education students receive is in line with curricular goals. A consistent and systematic evaluation process is at the heart of any strategic effort aimed at continual improvement. But this process can also be burdensome, time consuming, resource intensive, and disassociated from the teaching and learning process.

Seamlessly integrated into Blackboard Learn™, Blackboard Outcomes Assessment streamlines the juried assessment process by taking the hassle out of collecting student work, managing reviewers and evaluation sessions, and automating report generation on institutional and program student learning performance. Coupled with a rich set of consulting services, our Juried Assessment and Accreditation Solution provides step-by-step implementation guidance to ensure operational sustainability and growth across campus.

STREAMLINE EVIDENCE COLLECTION

With Blackboard Outcomes Assessment, Assessment professionals can automatically collect student submissions to Blackboard Learn™ course assignments across sections and disciplines and by demographic filters.

The integration between Blackboard Learn™ and Blackboard Outcomes Assessment embeds evidence collection activities into the day-to-day teaching and learning activities for faculty and students, making assessment of student performance on institutional and program learning outcomes a seamless part of the teaching and learning process.

MANAGE EVALUATION WORKFLOWS

Centrally manage evaluator workflows right within Blackboard Learn™. Assign evidence samples, track reviewer completions, and generate reports all from a single, familiar interface.

DEMONSTRATE ACHIEVEMENT

Institutions use Blackboard Outcomes Assessment to systematically evaluate student performance on learning outcomes. With this information at their fingertips, they can use the data to continually improve course and program quality in ways that align improvements in curricular design and delivery with student performance on institutional and program goals. Using reports that aggregate reviewers' evaluations on student performance, they gain granular insight into performance and inter-rater reliability.
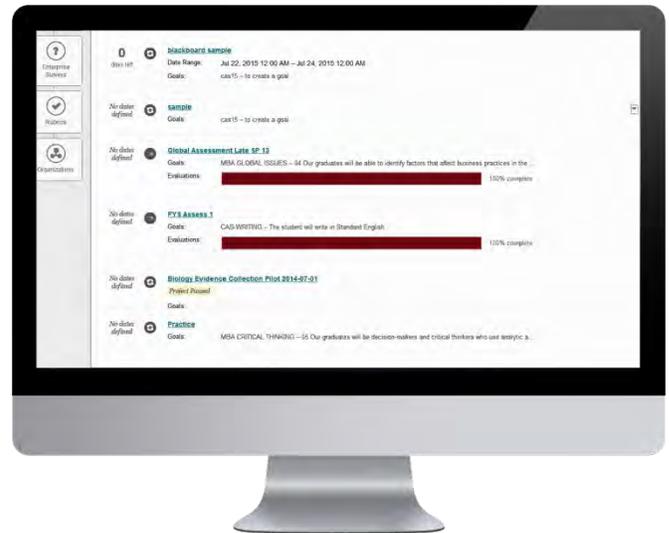

Align activities across the institution – Enable every unit of your institution to map its objectives to broader institutional goals, program outcomes, and accreditation standards.

Keep track of progress – Get clear, reliable results with up-to-date predefined reports. Quickly identify specific areas where student performance exceeds or is not meeting learning outcomes.

Identify gaps early – Provide gap insights so institutions can proactively intervene prior to broader performance or accreditation being negatively impacted.

Demonstrate continuous improvement against learning outcomes – Document improvements against standards and assessment plans to satisfy accrediting agencies and enhance your eligibility for funding and grants.

OUR EXPERTS WORK TO ENSURE YOUR SUCCESS

Our team of assessment and accreditation experts provide assessment and operational best practices, step-by-step guidance throughout the implementation process, and strategic support to institutions as they build and establish their sustainable processes in support of juried assessment and accreditation efforts. Our consultants work with you to establish sustainable practices to streamline accreditation compliance and optimize reporting in support of ongoing process improvement, improved teaching and learning, and student success.
